CONTENTS OF VOLUME 55

Agger T, Spohr AB, Nielsen J: α-Amylase production in high cell density submerged cultivation of *Aspergillus oryzae* and *A. nidulans* (Short contribution) 81

Andersen SM, Jørgensen C, Jacobsen CS: Development and utilisation of a medium to isolate phenanthrene-degrading *Pseudomonas* spp. (Short contribution) 112

Bardouille C, Lehmann J, Heimann P, Jockusch H: Growth and differentiation of permanent and secondary mouse myogenic cell lines on microcarriers 556

Bennett GN, San K-Y: Microbial formation, biotechnological production and applications of 1,2-propanediol 1

Bhosale PB, Gadre RV: Production of β-carotene by a mutant of *Rhodotorula glutinis* 423

Bolken TC, Franke CA, Zeller GO, Hruby DE: Identification of an intragenic integration site for foreign gene expression in recombinant *Streptococcus gordonii* strains 192

Bredberg K, Persson J, Christiansson M, Stenberg B, Holst O: Anaerobic desulfurization of ground rubber with the thermophilic archaeon *Pyrococcus furiosus* – a new method for rubber recycling 43

Cara J, Aller A, Otero M, Morán A: Idle time in the washing and iron concentration in leachate removed: two basic parameters in the desulphurization of coal in a packed column 49

Chao Y, Sugano Y, Shoda M: Bacterial cellulose production under oxygen-enriched air at different fructose concentrations in a 50-liter, internal-loop airlift reactor 673

Chatterjee T, Bhattacharyya DK: Biotransformation of limonene by *Pseudomonas putida* 541

Dabert P, Sialve B, Delgenès J-P, Moletta R, Godon J-J: Characterisation of the microbial 16S rDNA diversity of an aerobic phosphorus-removal ecosystem and monitoring of its transition to nitrate respiration 500

Decker CH, Visser J, Schreier P: β-Glucosidase multiplicity from *Aspergillus tubingensis* CBS 643.92: purification and characterization of four β-glucosidases and their differentiation with respect to substrate specificity, glucose inhibition and acid tolerance 157

Di Gioia D, Fava F, Bertin L, Marchetti L: Biodegradation of synthetic and naturally occurring mixtures of mono-cyclic aromatic compounds present in olive mill wastewaters by two aerobic bacteria 619

Eden A, Van Nedervelde L, Drukker M, Benvenisty N, Debourg A: Involvement of branched-chain amino acid aminotransferases in the production of fusel alcohols during fermentation in yeast 296

Faber BW, Schonewille ABJA, Gorcom RFM van, Duine JA: Constitutive and inducible hydroxylase activities involved in the degradation of naphthalene by *Cunninghamella elegans* 486

Farine S, Versluis C, Bonnici PJ, Heck A, L'homme C, Puigserver A, Biagini A: Application of high performance anion exchange chromatography to study invertase-catalysed hydrolysis of sucrose and formation of intermediate fructan products 55

Flores-Cotera LB, Martín R, Sánchez S: Citrate, a possible precursor of astaxanthin in *Phaffia rhodozyma*: influence of varying levels of ammonium, phosphate and citrate in a chemically defined medium 341

Förster C, Revuelta JL, Krämer R: Carrier-mediated transport of riboflavin in *Ashbya gossypii* 85

Futamata H, Harayama S, Watanabe K: Diversity in kinetics of trichloroethylene-degrading activities exhibited by phenol-degrading bacteria 248

Gern RMM, Furlan SA, Ninow JL, Jonas R: Screening for microorganisms that produce only endo-inulinase (Short contribution) 632

Govinden R, Pillay B, Zyl WH van, Pillay D: Xylitol production by recombinant *Saccharomyces cerevisiae* expressing the *Pichia stipitis* and *Candida shehatae XYL1* genes 76

Granström T, Ojamo H, Leisola M: Chemostat study of xylitol production by *Candida guilliermondii* 36

Gross RA, Kalra B, Kumar A: Polyester and polycarbonate synthesis by in vitro enzyme catalysis 655

Ha H-C, Honda Y, Watanabe T, Kuwahara M: Production of manganese peroxidase by pellet culture of the lignin-degrading basidiomycete, *Pleurotus ostreatus* 704

Hayashi N, Ito M, Horiike S, Taguchi H: Molecular cloning of a putative divalent-cation transporter gene as a new genetic marker for the identification of *Lactobacillus brevis* strains capable of growing in beer 596

Hernandez-Perez G, Fayolle F, Vandecasteele J-P: Biodegradation of ethyl *t*-butyl ether (ETBE), methyl *t*-butyl ether (MTBE) and *t*-amyl methyl ether (TAME) by *Gordonia terrae* 117

Huang HK, Tseng SK: Nitrate reduction by *Citrobacter diversus* under aerobic environment (Short contribution) 90

Hüsken LE, Beeftink R, Bont JAM de, Wery J: High-rate 3-methylcatechol production in *Pseudomonas putida* strains by means of a novel expression system 571

Hüttermann A, Mai C, Kharazipour A: Modification of lignin for the production of new compounded materials 387

Irie T, Honda Y, Watanabe T, Kuwahara M: Efficient transformation of filamentous fungus *Pleurotus ostreatus* using single-strand carrier DNA (Short contribution) 563

Irie T, Honda Y, Watanabe T, Kuwahara M: Homologous expression of recombinant manganese peroxidase genes in ligninolytic fungus *Pleurotus ostreatus* 566

Jaeger K-E, Eggert T, Eipper A, Reetz MT: Directed evolution and the creation of enantioselective biocatalysts 519

Jan J, Valle F, Bolivar F, Merino E: Construction of protein overproducer strains in *Bacillus subtilis* by an integrative approach 69

Jung Y, Kwak J, Lee Y: High-level production of heme-containing holoproteins in *Escherichia coli* 187

Jürgen B, Hanschke R, Sarvas M, Hecker M, Schweder T: Proteome and transcriptome based analysis of *Bacillus subtilis* cells overproducing an insoluble heterologous protein 326

Kalogo Y, M'Bassiguié Séka A, Verstraete W: Enhancing the start-up of a UASB reactor treating domestic wastewater by adding a water extract of *Moringa oleifera* seeds 644

Kang HA, Hong W-K, Sohn J-H, Choi E-S, Rhee SK: Molecular characterization of the actin-encoding gene and the use of its promoter for a dominant selection system in the methylotrophic yeast *Hansenula polymorpha* 734

Karlsson S, Holmbom B, Spetz P, Mustranta A, Buchert J: Reactivity of *Trametes* laccases with fatty and resin acids (Short contribution) 317

Kato T, Haruki M, Imanaka T, Morikawa M, Kanaya S: Isolation and characterization of psychrotrophic bacteria from oil-reservoir water and oil sands 794

Kawamoto T, Kanda T, Tanaka A: Preparation of an organic solvent-tolerant strain from baker's yeast 476

Kharoune M, Kharoune L, Lebeault JM, Pauss A: Isolation and characterization of two aerobic bacterial strains that completely degrade ethyl *tert*-butyl ether (ETBE) 348

Kieboom J, Brink H van den, Frankena J, Bont JAM de: Production of 3-nitrocatechol by oxygenase-containing bacteria: optimization of the nitrobenzene biotransformation by *Nocardia* S3 290

Kizaki N, Yasohara Y, Hasegawa J, Wada M, Kataoka M, Shimizu S: Synthesis of optically pure ethyl (*S*)-4-chloro-3-hydroxybutanoate by *Escherichia coli* transformant cells coexpressing the carbonyl reductase and glucose dehydrogenase genes 590

Krämer U, Chardonnens AN: The use of transgenic plants in the bioremediation of soils contaminated with trace elements 661

Kumar RS, Sakthivel N: Exopolysaccharides of *Xanthomonas* pathovar strains that infect rice and wheat crops 782

Lankinen VP, Bonnen AM, Anton LH, Wood DA, Kalkkinen N, Hatakka A, Thurston CF: Characteristics and N-terminal amino acid sequence of manganese peroxidase from solid substrate cultures of *Agaricus hisporus* 170

Letisse F, Chevallereau P, Simon J-L, Lindley ND: Kinetic analysis of growth and xanthan gum production with *Xanthomonas campestris* on sucrose, using sequentially consumed nitrogen sources 417

Li Y, Chen J, Lun S-Y, Rui X-S: Efficient pyruvate production by a multi-vitamin auxotroph of *Torulopsis glabrata*: key role and optimization of vitamin levels 680

Lindberg LE, Holmbom BR, Väisänen OM, Weber AM-L, Salkinoja-Salonen MS: Sugar composition of biofilms produced by paper mill bacteria 638

Lund M, Ragauskas AJ: Enzymatic modification of kraft lignin through oxidative coupling with water-soluble phenols 699

Mai C, Schormann W, Hüttermann A: Chemo-enzymatically induced copolymerization of phenolics with acrylate compounds 177

Malaoui H, Marczak R: Influence of glucose on glycerol metabolism by wild-type and mutant strains of *Clostridium butyricum* E5 grown in chemostat culture 226

Manohar S, Kim CK, Karegoudar TB: Enhanced degradation of naphthalene by immobilization of *Pseudomonas* sp. strain NGK1 in polyurethane foam 311

Maskow T, Babel W: A calorimetrically based method to convert toxic compounds into poly-3-hydroxybutyrate and to determine the efficiency and velocity of conversion 234

Matsushima K, Chang P-K, Yu J, Abe K, Bhatnagar D, Cleveland TE: Pre-termination in *aflR* of *Aspergillus sojae* inhibits aflatoxin biosynthesis 585

Matsushima K, Yashiro K, Hanya Y, Abe K, Yabe K, Hamasaki T: Absence of aflatoxin biosynthesis in koji mold (*Aspergillus sojae*) 771

Mehta SK, Gaur JP: Concurrent sorption of Ni^{2+} and Cu^{2+} by *Chlorella vulgaris* from a binary metal solution 379

Menge M, Mukherjee J, Scheper T: Application of oxygen vectors by *Claviceps purpurea* cultivation 411

Michel C, Brugna M, Aubert C, Bernadac A, Bruschi M: Enzymatic reduction of chromate: comparative studies using sulfate-reducing bacteria. Key role of polyheme cytochromes *c* and hydrogenases 95

Moore AJ, Challen MP, Warner PJ, Elliott TJ: RAPD discrimination of *Agaricus bisporus* mushroom cultivars 742

Mora A, Earle ED: Combination of *Trichoderma harzianum* endochitinase and a membrane-affecting fungicide on control of *Alternaria* leaf spot in transgenic broccoli plants 306

Moser R, Stahl U: Insights into the genetic diversity of initial dioxygenases from PAH-degrading bacteria 609

Muthumbi W, Boon N, Boterdaele R, De Vreese I, Top EM, Verstaete W: Microbial sulfate reduction with acetate: process performance and composition of the bacterial communities in the reactor at different salinity levels 787

Naito M, Kawamoto T, Fujino K, Kobayashi M, Maruhashi K, Tanaka A: Long-term repeated biodesulfurization by immobilized *Rhodococcus erythropolis* KA2-5-1 cells 374

Naumov GI, Naumova ES, Aigle M, Masneuf I, Belarbi A: Genetic reidentification of the pectinolytic yeast strain SCPP as *Saccharomyces bayanus* var. *uvarum* 108

Nielsen J: Metabolic engineering 263

Nishio T, Patel A, Wang Y, Lau PCK: Biotransformations catalyzed by cloned *p*-cymene monooxygenase from *Pseudomonas putida* F1 321

Or-Rashid MM, Onodera R, Wadud S: Biosynthesis of methionine from homocysteine, cystathionine and homoserine plus cysteine by mixed rumen microorganisms in vitro 758

Pastor FIJ, Pujol X, Blanco A, Vidal T, Torres AL, Díaz P: Molecular cloning and characterization of a multidomain endoglucanase from *Paenibacillus* sp BP-23: evaluation of its performance in pulp refining 61

Paul A-L, Semer C, Kucharek T, Ferl RJ: The fungicidal and phytotoxic properties of benomyl and PPM in supplemented agar media supporting transgenic arabidopsis plants for a Space Shuttle flight experiment 480

Peng X, Sun J, Iserentant D, Michiels C, Verachtert H: Flocculation and coflocculation of bacteria by yeasts (Short contribution) 777

Perei K, Rákhely G, Kiss I, Polyák B, Kovács KL: Biodegradation of sulfanilic acid by *Pseudomonas paucimobilis* 101

Petersen M, Alfermann AW: The production of cytotoxic lignans by plant cell cultures 135

Piveteau P, Fayolle F, Vandecasteele J-P, Monot F: Biodegradation of *tert*-butyl alcohol and related xenobiotics by a methylotrophic bacterial isolate 369

Plessis CA du, Strauss JM, Riedel K-HJ: BTEX catabolism interactions in a toluene-acclimatized biofilter 122

Přepechalová I, Martínková L, Stolz A, Ovesná M, Bezouška K, Kopecký J, Křen V: Purification and characterization of the enantioselective nitrile hydratase from *Rhodococcus equi* A4 150

Raghukumar C, Rivonkar G: Decolorization of molasses spent wash by the white-rot fungus *Flavodon flavus*, isolated from a marine habitat 510

Rättö M, Chatani M, Ritschkoff A-C, Viikari L: Screening of micro-organisms for decolorization of melanins produced by bluestain fungi 210

Reetz MT, Hermes M, Becker MH: Infrared-thermographic screening of the activity and enantioselectivity of enzymes 531

Rehm BHA, Steinbüchel A: Heterologous expression of the acyl-acyl carrier protein thioesterase gene from the plant *Umbellularia californica* mediates polyhydroxyalkanoate biosynthesis in recombinant *Escherichia coli* 205

Rey M, Delgado-Jarana J, Benítez T: Improved antifungal activity of a mutant of *Trichoderma harzianum* CECT 2413 which produces more extracellular proteins 604

Robinson T, Singh D, Nigam P: Solid-state fermentation: a promising microbial technology for secondary metabolite production 284

Ruijssenaars HJ, Hartmans S: Plate screening methods for the detection of polysaccharase-producing microorganisms 143

Samanta SK, Bhushan B, Jain RK: Efficiency of naphthalene and salicylate degradation by a recombinant *Pseudomonas putida* mutant strain defective in glucose metabolism 627

Saxena S, Pandey AK: Microbial metabolites as eco-friendly agrochemicals for the next millennium 395

Schröter K, Flaschel E, Pühler A, Becker A: *Xanthomonas campestris* pv. campestris secretes the endoglucanases ENGXCA and ENGXCB: construction of an endoglucanase-deficient mutant for industrial xanthan production 727

Sei K, Nakao M, Mori K, Ike M, Kohno T, Fujita M: Design of PCR primers and a gene probe for extensive detection of poly(3-hydroxybutyrate) (PHB)-degrading bacteria possessing fibronectin type III linker type-PHB depolymerases 801

Shibasaki S, Ueda M, Iizuka T, Hirayama M, Ikeda Y, Kamasawa N, Osumi M, Tanaka A: Quantitative evaluation of the enhanced green fluorescent protein displayed on the cell surface of *Saccharomyces cerevisiae* by fluorometric and confocal laser scanning microscopic analyses 471

Silveira MM, Wisbeck E, Hoch I, Jonas R: Production of glucose-fructose oxidoreductase and ethanol by *Zymomonas mobilis* ATCC 29191 in medium containing corn steep liquor as a source of vitamins (Short contribution) 442

Simmering R, Blaut M: Pro- and prebiotics – the tasty guardian angels? 19

Swift RJ, Carter SF, Widdowson DA, Mason JR, Leak DJ: Expression of benzene dioxygenase from *Pseudomonas putida* ML2 in cis-1,2-cyclohexanediol-degrading pseudomonads 721

Syu M-J: Biological production of 2,3-butanediol 10

Takahashi S, Ueda M, Tanaka A: Function of the prosequence for inn vivo folding and secretion of active *Rhizopus oryzae* lipase in *Saccharomyces cerevisiae* (Short contribution) 454

Tamai Y, Tanaka K, Kaneko Y, Harashima S: *HO* gene polymorphism in *Saccharomyces* industrial yeasts and application of novel *HO* genes to convert homothallism to heterothallism in combination with the mating-type detection cassette 333

Tarui H, Murata M, Tani I, Imanishi S, Nishikawa S, Hara T: Establishment and characterization of cell-free translation/glycosylation in insect celel (*Spodoptera frugiperda* 21) extract prepared with high pressure treatment 446

Traub PC, Schmidt-Dannert C, Schmitt J, Schmid RD: Gene synthesis, expression in *E. coli*, and in vitro refolding of *Pseudomonas* sp. KWI 56 and *Chromobacterium viscosum* lipases and their chaperones 198

Tsekova K, Ilieva S: Copper removal from aqueous solution using *Aspergillus niger* mycelia in free and polyurethane-bound form (Short contribution) 636

Tuomela M, Hatakka A, Raiskila S, Vikman M, Itävaara M: Biodegradation of radiolabelled synthetic lignin (^{14}C-DHP) and mechanical pulp in a compost environment 492

Veiga MC, Kennes C: Parameters affecting performance and modeling of biofilters treating alkylbenzene-polluted air 254

Velázquez AC, Pometto III AL, Ho K-LG, Demirci A: Evaluation of plastic-composite supports in repeated fed-batch biofilm lactic acid fermentation by *Lactobacillus casei* 434

Verseck S, Bommarius A, Kula M-R: Screening, overexpression and characterization of an *N*-acylamino acid racemase from *Amycolatopsis orientalis* subsp. *lurida* 354

Villarante NR, Armenante PM, Quibuyen TAO, Fava F, Kafkewitz D: Dehalogenation of dichloroethene in a contaminated soil: fatty acids and alcohols as electron donors and an apparent requirement for tetrachloroethene 239

Villatte F, Hussein AS, Bachmann TT, Schmid RD: Expression level of heterologous proteins in *Pichia pastoris* is influenced by flask design (Short contribution) 463

Voss I, Steinbüchel A: High cell density cultivation of *Rhodococcus opacus* for lipid production at a pilot-plant scale 547

Wadud S, Onodera R, Or-Rashid MM: Studies on the possibility of histidine biosynthesis from histidinol, imidazolepyruvic acid, imidazoleacetic acid, and imidazolelactic acid by mixed ruminal bacteria, protozoa, and their mixture in vitro 219

Wang B-D, Chen D-C, Kuo T-T: Characterization of a *Saccharomyces cerevisiae* mutant with oversecretion phenotype 712

Wang C, Wu J, Mei X: Enhancement of Taxol production and excretion in *Taxus chinensis* cell culture by fungal elicitation and medium renewal 404

Weymarn N von, Nyyssölä A, Reinikainen T, Leisola M, Ojamo H: Improved osmotolerance of recombinant *Escherichia coli* by de novo glycine betaine biosynthesis 214

Wicher KB, Abou-Hachem M, Halldórsdóttir S, Thorbjarnadóttir SH, Eggertsson G, Hreggvidsson GO, Nordberg Karlsson E, Holst O: Deletion of a cytotoxic, N-terminal putative signal peptide results in a significant increase in production yields in *Escherichia coli* and improved specific activity of Cel12A from *Rhodothermus marinus* 578

Wick M, Vanhoutte J-J, Adhemard A, Turini G, Lebeault J-M: Automatic method for evaluating the activity of sourdough strains based on gas pressure measurements 362

Wiese A, Wilms B, Syldatk C, Mattes R, Altenbuchner J: Cloning, nucleotide sequence and expression of a hydantoinase and carbamoylase gene from *Arthrobacter aurescens* DSM 3745 in *Escherichia coli* and comparison with the corresponding genes from *Arthrobacter aurescens* DSM 3747 750

Wijayarathna CD, Wachi M, Nagai K: Isolation of *ftsI* and *murE* genes involved in peptidoglycan synthesis from *Corynebacterium glutamicum* 466

Yun Y-S, Park JM: Attenuation of monochromatic and polychromatic lights in *Chlorella vulgaris* suspensions 765

Zaiat M, Rodrigues JAD, Ratusznei SM, Camargo EFM de, Borzani W: Anaerobic sequencing batch reactors for wastewater treatment: a developing technology 29

Zhang D-H, Lee Y-K: Two-step process for ketocarotenoid production by a green alga, *Chlorococcum* sp. strain MA-1 537

Zhang K, Miyachi S, Kurano N: Evaluation of a vertical flat-plate photobioreactor for outdoor biomass production and carbon dioxide bio-fixation: effects of reactor dimensions, irradiation and cell concentration on the biomass productivity and irradiation utilization efficiency 428

Zhang W, Jin MF, Yu XJ, Yuan Q: Enhanced anthocyanin production by repeated-batch culture of strawberry cells with medium shift 164

Zhao J, Fujita K, Yamada J, Sakai K: Improved β-thujaplicin production in *Cupressus lusitanica* suspension cultures by fungal elicitor and methyl jasmonate 301

Zhao J, Hu Q, Guo Y-Q, Zhu W-H: Effects of stress factors, bioregulators, and synthetic precursors on indole alkaloid production in compact callus clusters cultures of *Catharanthus roseus* 693

Zhuge J, Fang H-Y, Wang Z-X, Chen D-Z, Jin H-R, Gu H-L: Glycerol production by a novel osmotolerant yeast *Candida glycerinogenes* 686
